

JERAD

EXECUTIVE COMMITTEE

electjerad.com

I believe,

Our country depends on the foundation of a robust public education system. Unfortunately, this system has been under attack and continues to be a target and we must come together. Whether we contribute to public education inside the classroom, halls, on buses, in cafeterias, on campuses, and even those who work inside an office that may never see a student need to fight for our professions and our students' future. It is going to take every educator, pre- kindergarten all the way to educators in our higher education system to make sure we are successful.

What success looks like,

- Educators are well informed.
- Educators have supports they need; all Educators working either inside and outside a classroom.
- Educators have resources to be successful
Educators, at all levels, are included in the decision-making process.
- All Students have the same opportunities, regardless of location, race, socioeconomic status or gender identity.
- Students and Educators feel safe so learning can prosper.

About Jerad Reay and his Experience

Jerad Reay's Bio

Jerad A. Reay is the elected President of the Utah School Employees Association (USEA), representing approximately 4,500 ESP members. In his role as President, he is called upon to serve his members at the local, state, and national levels. Jerad is aware of the need to understand and be involved in politics at all levels, and is well-received in a variety of venues. He is helping to lead a major transformation project that USEA is engaged in for the past four years. Jerad has a wide variety of skills in the technology field. He currently serves as Manager of Information Systems/Senior Network Engineer for Box Elder School District in Brigham City, Utah.

Jerad attended Utah State University, studying Computer Information Systems and the Advanced Technical Center Network Engineer program. He also has a number of IT industry certifications. Jerad brings his grassroots knowledge, outgoing personality, excellent communication skills, and mature judgment gained in the field of education to his work and the association.
